

## **Amendment #1 – State of Maryland, Request for Proposals #: LA-03-22**

The following modifications are hereby made a part of the State of Maryland R.F.P. LA-03-22:

- 1. The requirements of the test fit required by Section 1.5 of RFP 03-22 will be amended to allow the submission of a blocking and stacking plan as part of the Technical Response. Blocking and stacking plans will still be required to include the proposed circulation as Offeror's will still need to propose the NUSF required to complete the project at their proposed facility. All Subprograms and the total space required for each department identified in the space program should be clearly differentiated on all submitted test fits.**
  - a. All other terms of Section 1.5 of RFP 03-22 will remain unchanged. This is inclusive of Section 1.5.4 (If Offerors are required to make changes to their proposed plan/ test fit they will have the ability to adjust their NUSF by +/- 5%, however the proposed annual rent cannot increase beyond their initial proposal even if there is an increase in square footage).**
