Introduction

Green fleet policies are a win-win for fleets — organizations can demonstrate their commitment to sustainability while, at the same time, reducing fuel and maintenance costs. [Federal fleets](#) will lead by example to help “create a clean energy economy that will increase our Nation’s prosperity, promote energy security, protect the interests of taxpayers, and safeguard the health of our environment.” The Fleet Management Association has developed [NAFA’s Sustainable Fleet Standard Program](#). This program hopes to clarify and define what sustainable means for fleet vehicles and what savings can be expected from sustainable fleet management.

Maryland Department of General Services has several [contracts](#) for fleet vehicles and electric utility vehicles.

Please see the vehicle listings below for alternative fuel and fuel efficient vehicles available on state contracts.
