

Amendment #1 – State of Maryland, Request for Proposals #: LA-02-24

The following modifications are hereby made a part of the State of Maryland R.F.P. LA-02-24:

The following language is deleted from Section 1.5.1 of the RFP:

1.5.1 As an exhibit to its RFP submission, Offerors must include a proposed test-fit to support its NUSF measurement. The test fit should be detailed to provide the NUSF measurement of each individual program requirement listed on the provided space program. When completing the test fit, the space program attached as an exhibit to this document should be used to detail adjacencies and business units that will be required to be located within proximity to each other. Any other specific program requirements will also be found detailed in that area. Offeror's are encouraged to reuse as much existing infrastructure as possible to bring the proposed space to closely mirror the attached space program and should identify the specifications of all building materials used as an addendum to the test-fit.

And Replaced with the following language:

1.5.1 As an exhibit to its RFP submission, Offerors must include a **blocking plan** to support its NUSF measurement. The blocking plan should be detailed to provide the NUSF measurement proposed for the requirement. When completing the blocking plan, the space program attached as an exhibit to this document should be used to detail adjacencies and business units that will be required to be located within proximity to each other. Any other specific program requirements will also be found detailed in that area. Offeror's are encouraged to reuse as much existing infrastructure as possible to bring the proposed space to closely mirror the attached space program and should identify the specifications of all building materials used as an addendum to the blocking plan.
